Antikythera Device

Design and construction by Andrew Carrol.
Model instructions by Sean Turner

3715 Pieces

Lego model of the astronomical device found off the coast of the island of Antikythera over 100 years ago.

"Left" legs - 20 required

11

12

"Right" legs - 20 required

7

8

12

13

"Side" components - 20 required in total

2

3

x20

"Standard Cradle" components - 7 required

5

6

7  4x

8  15L
1x

x7

"Standard Base" component each comprised of 2 "sides" and 1 "standard cradle" - 7 required

Single cross support used as a basic building component - 26 required in total

Left Bottom Back (LBB) Calculator
Multiplies input by -4, divides by 19
